Technical datasheet

Teflon ES 16/2 0+01 (NI) grey

Article code: LWTE560107

General information			
Product group	Light Weight Rubber		
Industry segment	Tyre; Chemicals, rubber & plastics		
Indication of use	Slider bed, Rollers		
Belt construction			
Tension layer		polyester spun, flexible	
Number of plies		2	
Top side	material	Teflon, TE	
	finish	smooth	
	color	grey	
Bottom side	material	fabric, polyester	
	finish	bare fabric	
	color	brown	

····· · ···· · ····· · ······ · ········	ISO 21181 AB method KV.002		16	N/mm	91.36	lbc/in
Thickness A	AB method KV.002				51.50	105/111.
		belt	2.8	mm	0.11	in.
		top cover	0.1	mm	0	in.
Weight A	AB method KV.004		2.3	kg/m²	0.47	lbs/ft²
Operating temperature c	continuous	from / to	-54 / 150	°C	-65.2 / 302	°F
s	short	from / to	-54 / 170	°C	-65.2 / 338	°F
Manufacturing width s	standard		1219	mm	47.99	in.
n	maximum		1219	mm	47.99	in.

Fabrication

Vulcanizing is always preferable. Cold splicing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ. We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications.
