Technical datasheet

## Ropanyl ESM 5/2 00+015 light blue M1 AS FG AM NF

Article code: SBRY579629

General information						
Product group	Synthetic Belts					
Industry segment	Food: Confectionary & candy, Bakery					
Main product feature	Antistatic, Foodgrade, Non-fraying, Knife edge transfer					
Indication of use	Slider bed, Rollers, Flat, Troughed					
Belt construction						
Tension layer	polyester, stable					
Number of plies		2				
Top side	material	Ropanyl, TPU	Ropanyl, TPU			
	finish	smooth, M1 Fine	smooth, M1 Fine matt finish			
	color	Light blue	Light blue			
Bottom side	material	Ropanol, PUR	Ropanol, PUR impregnated fabric			
	finish	impregnated fab				
<b>color</b> Light blue						
Characteristics						
Food Grade (FG)	yes		EC 1935/2004, EU 10/2011; FDA			
Antistatic (AS)	yes	ISO 21178	ISO 21178			
High conductive (HC)	no					
Flame-retardant (FR)	no					
ATEX approval	no					
Technical data						
Hardness	100 969	top cido	93A Sho			
	ISO 868	top side			lhe (in	
Force at 1% elongation (static)	ISO 21181	total.	5 N/n		lbs/in.	
Thickness	AB method KV.002	total	1.3 mm			
Wataba		top cover	0.15 mm			
Weight	AB method KV.004	for any the	1.4 kg/		lbs/ft <sup>2</sup>	
Operating temperature	continuous	from / to	-20 / 90 °C	-4 / 194		
Minimum multiple d'annu tar	short	from / to	-30 / 110 °C	-22 / 230		
Minimum pulley diameter	flexing		5 mm			
	backflexing		20 mm			
Manufacturing width	standard		2000 mm			
	maximum		3000 mm	n 118.11	in.	

## Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

## **Additional information**

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ. We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications.
