Technical datasheet

Ropanyl ESF 6/2 01+04 light blue M2 FG AM NF

Article code: SBRY592181

General information							
Product group	Synthetic Belts	Synthetic Belts					
Industry segment	Food: Confectionary & candy, Bakery; Container & packaging						
Main product feature	Foodgrade, Anti-micro	Foodgrade, Anti-microbial, Non-fraying					
Indication of use	Slider bed, Rollers, Fla	Slider bed, Rollers, Flat					
Belt construction							
Tension layer		polyester, flexible					
Number of plies		2	2				
Top side	material	Ropanyl, TPU	Ropanyl, TPU				
	finish	smooth, M2 Ma	smooth, M2 Matt finish				
	color	Light blue	Light blue				
Bottom side	material	Ropanol, TPU					
	finish	smooth	smooth				
	color	Light blue	Light blue				
Characteristics							
Food Grade (FG)	yes	EC 1935/2004,	EC 1935/2004, EU 10/2011; FDA				
Antistatic (AS)	no						
High conductive (HC)	no						
Flame-retardant (FR)	no						
ATEX approval	no						
Technical data							
Hardness	ISO 868	top side	854	Shore			
Force at 1% elongation (static)	ISO 21181	top side		N/mm	34.26	lbs/in.	
Thickness	AB method KV.002	total		mm	0.06		
Thickness	AD method KV.002	top cover		mm	0.00		
Weight	AB method KV.004			kg/m²		lbs/ft ²	
Operating temperature	continuous	from / to	-20 / 90		-4 / 194		
	short	from / to	-20 / 90		-22 / 230		
Minimum pulley diameter	flexing			mm	-22 / 230		
	backflexing			mm	0.59		
Manufacturing width	standard		1900		74.8		
	maximum		2000		74.8		
	ΠαλΙΠΙΙΠ		2000		/0./4		

Fabrication

Hot splicing is always preferable. Glueing can only be done when the belt is exposed to normal temperature and the humidity is not excessive. For the working method, consult the splice information and the equipment literature. Apply the recommended splice as indicated in the seperate information.

Additional information

This sheet contains typical values, which apply to a temperature of approx. 20 °C (68 °F), unless otherwise stated, individual data may differ. We recommend to keep the belt tension to a practical working minimum to maximize the service life of the belt and machine parts.

Always protect belts from sunlight/UV-radiation, avoid temperatures below 10°C and above 40°C, dust and dirt. Store belts in a cool and dry place and if possible in their original packaging.

For details consult 'Storage and handling instructions' or contact our specialist.

Because of continuous development, the presented data is subject to alteration. This data replaces that included in previous publications. Ammeraal Beltech excludes any liability for the incorrect use of the above stated information.
