# Belts for the Fish & Seafood Industry

# Understanding Your Production Processes

**Efficient, reliable, and food-safe belts for high and low temperature fish and seafood applications. From ship to shore, your catch is safe on our belts.**

1. Inlet of fish and seafood from tank
2. Heading / Gutting / Filleting / Separating
3. Washing / Rinsing
4. Offloading of fish and seafood blocks from freezer
5. Packing
6. Weighing, batching & grading

## Sanitation and hygiene

### Challenge

Poor hygiene at any stage of your production process can affect product quality and shelf life, which can cause health hazards.

### Solution

We developed a line of processing belts for use in applications where hygienic and sanitary solutions are of the utmost importance.

**ONE STOP**  
**SHS**  
belt

Ammeraal Beltech  
member of the European  
Hygienic Engineering  
& Design Group

Food Grade belts comply  
with EC 1935/2004 and USDA  
standards supporting your  
ISO 22000 requirements  
(previously HACCP)

The often extreme operational environments in this industry demand belts with special characteristics.

In some cases, belts must be smooth and non-absorbent to water or oils – in other cases, an extremely high pulling force or great impact resistance is needed.

Ammeraal Beltech offers all this along with the strongest Food Grade modular belts available on the entire market and much more.

» *“From stunning, kill zone, heading, gutting, filleting, and slicing to portioning, waste management, and packaging, Ammeraal Beltech can provide the right belt solutions for our needs.”*

## SAFE & CLEAN

### The SAFE & CLEAN concept generation of belts

Food Safety is more important than ever! As a leading manufacturer of process and conveyor belts, particularly for the food industry, Ammeraal Beltech is constantly developing new generations of products and solutions with a focus on hygiene, the cornerstone of your and Ammeraal Beltech's business. Confidence in our Food Safety approach is the paramount reason for choosing Ammeraal Beltech as your belt supplier.

The **SAFE & CLEAN** concept supports you in two ways:

#### SAFE

- Safe products, in full compliance with international standards as EC 1935/2004, EU 10/2011, and FDA standards
- Belt designs, colors, and materials that all help you to achieve your ISO 22000 requirements (previously HACCP)
- Innovative solutions to avoid migration to food product
- Records for full traceability of belt materials

#### CLEAN

- Belts that are easy and quick to clean
- Drastic reduction in cleaning costs
- Less labor-intensive, and less water and detergent required
- Unique designs for easy cleanability (no hiding places for bacteria)
- The possibility of cleaning the belt while it's in motion
- Greater control of cross-contamination thanks to visible contrast between blue belt and food product

Ammeraal Beltech SAFE & CLEAN reduces your cleaning costs

## A Trusted Partner

Ammeraal Beltech works with distributors and OEMs as partners to provide conveyor belt processing solutions that can improve product quality, reduce maintenance times, and lower manufacturing costs.

Innovative solutions to meet customer challenges:

Industry challenges	Ammeraal Beltech solutions
Cleanability	Hygienic design across our entire product range, making cleaning easier, less time-consuming, and more cost effective
Belt failure	<ul style="list-style-type: none"> <li>• Durable modular belts</li> <li>• Material resistant to chlorine detergent in intensive cleaning</li> <li>• Food Grade and homogeneous belts</li> <li>• Cut and impact resistance</li> <li>• Highest belt strength</li> </ul>
Blade marks	<ul style="list-style-type: none"> <li>• Bacteria traps</li> <li>• Impact on the belt and sharp edges</li> <li>• Heavy loads</li> <li>• Food Safety requirements</li> </ul>
Extreme operating conditions	Belts designed for harsh working environments
Sticky or wet product	Non-stick material and belt finishing

### uni MPB 25% Open Cone Top

The uni **MPB 25% Open Cone Top** belt is specifically designed for fish and seafood processing, an ideal product for light to medium product transportation, as well as incline and decline applications. Excellent stability, grip, and product release capabilities are combined with the superior drainage properties and outstanding cleanability.

## Belting Solutions For Your Application

### Dectyl

- Metal Detectable, including full range of accessories (Sealed Edges, Tracking Guides, Cleats, Sidewalls)
- Test Card proofing kit
- Food Grade EC 1935/2004, EC 10/2011 and FDA
- Available in non-stick and grip versions
- 1:1 easy switch from Classic synthetic belts

### Synthetic Ropanyl & Nonex Belts

- Food Grade (complies with EC and FDA standards), easy-to-clean
- Good resistance to oil and fat
- Excellent resistance to cleaning agents
- Available in blue and white
- Sealed edges

### AmSqueeze and MegaSqueeze belts for separating

- Longer belt life delivers lower cost of ownership
- Customizable top profile to match your application and product and optimize yield
- Endless belt material design removes splice failure

### Soliflex

- Unique and ultra hygienic belt design
- Excellent product release properties
- Less waste, easy to clean in minimal time, and reduced water waste
- 5 Soliflex drive systems available to suit your needs.

#### **uni MPB 25% open Cone Top**

- Non-stick and drainage properties
- Cone top surface designed to avoid product damage
- Reduces sanitation downtime and water usage
- Food Grade and complies with EC and FDA standards

#### **uni MPB 20% open Flush Grid Nub Top**

- Improved hygienic performance thanks to the unique Nub Top surface
- Improved non-stick performance
- Excellent drainage properties
- Convenient belt retrofit

#### **uni UltraClean Sprocket**

- Outstanding hygienic performance
- Easy sprocket, shaft, and belt cleaning
- Reduced water and cleaning agents consumption
- Easy installation and replacement, less downtime, and lower maintenance costs
