

Product Information Sheet

New RAPPLON® QuickSplice TG Items

Introducing new QuickSplice solutions

Introducing new QuickSplice solutions complementing the existing Classic range for various transport and process applications.

The belts' running side offers an exceptionally low coefficient of friction – making it a perfect solution for slider bed supported applications, while also suitable for roller supported layouts. The top side features wear-resistant rubber covers designed to handle demanding products such as paper, corrugated board and many other abrasive materials.

QuickSplice joining technology, combined with our tools offered, guarantees a quick replacement even in tight and difficult-to-access areas.

● **FBTG054576 TG E15.30 RQ** ● **FBTG054577 TG E15.35 RQ**

FEATURES

- Polyamide fabric bottom cover offers minimal friction
- High grip wear resistant rubber top cover
- Very flexible tensile members improve energy efficiency
- No elongation, ensuring dimensional stability
- QuickSplice joining technology for quick and reliable replacement

BENEFITS

- No wearing on sliding tables
- Consistent high grip for transport
- Extended service life
- Low load on bearings
- Just fit and forget
- Reduced downtimes
- No adhesives used

Item	Description	Thickness [mm]	K1% N/mm dynamic	Min. pulley Ø in mm	Cover material bottom side	Cover material top side	Endless joining method
