

Product Information Sheet

uni SNB M2 20% Open Nub Top

Maximising Hygiene with Non-stick Properties and Superior Drainage

The new uni SNB M2 20% Open Nub Top modular belt is a line extension of the uni SNB M2 series, complete with all related accessories, including product supports and sidewalls. Setting a new benchmark in industry standards, this 1" pitch modular belt offers superior drainage, non-stick properties, and enhanced hygiene performance.

With its 20% open mesh and round nubs, uni SNB M2 20% Open Nub Top significantly reduces the sticking and adhesion of wet products to the belt surface. This design ensures seamless product conveyance and avoids interference with the inspection process.

uni SNB M2 20% Open Nub Top is available in PE, POM and PP materials in blue or white. PE offers enhanced resistance to low temperatures, chemical attacks, and impacts.

MAIN APPLICATION

- **Fruit and Vegetable Industry:** ideal for washing, dewatering, cooling, mixing vegetable leaves, and fresh cut in general.
- **Shrimp Glazing and Fish Processing:** non-cling effect for optimal product conveyance.

KEY ADVANTAGES

- Superior embossing: prevents product sticking
- Excellent drainage: 20% open area
- Improved hygienic performance thanks to the round and nub top
- Easy to clean and maintain
- Compatible with uni UltraClean Two-Part Sprocket
